PETITION TO SAVE ST. PAUL'S FOR COMMUNITY USE

We, the undersigned, support the mission of The Committee to Save St. Paul's to find a reasonable and affordable solution to save the historic St. Paul's building (circa 1879) and to keep it under public control for public use. The historic St. Paul's main building and surrounding acres were purchased in 1993 from the Episcopal Diocese of Long Island for use by the residents of the Village. I understand that the Committee's goal may involve some public expense; therefore, I do not oppose some form of mixed public-private use to help offset the operating costs associated with restoration and maintenance of the Main Building; however, the structure should remain under the ownership of the Village of Garden City and its residents. I believe that the primary purpose for the St. Paul's School building should be for community use, first and foremost, not for condominium development.
